HEWLETT-PACKARD JOURNAL

Volume 36 January 1985 through December 1985

Index

Hewlett-Packard Company, 3000 Hanover Street, Palo Alto, California 94304 U.S.A.
Hewlett-Packard Central Mailing Dept., P.O. Box 529, Startbaan 16, 1180 AM Amstelveen, The Netherlands
Hewlett-Packard (Canada) Ltd., 6877 Goreway Drive, Mississauga, Ontario L4V 1M8 Canada
Yokogawa-Hewlett-Packard Ltd., Suginami-ku, Tokyo 168 Japan

PART 1: Chronological Index

January 1985

Optical Stimulus and Receivers for Parametric Testing in Fiber Optics, *Achim Eckert and Wolfgang Schmid*

Handling Fiber Optic Components

A Precise, Programmable 850-nm Optical Signal Source, *Wolfgang Schmid, Bernhard Flade, Klaus Hoeing, and Rainer Eggert*

Laser Safety Practices

A Versatile, Programmable Optical Pulse Power Meter, *Werner Berkel, Hans Huning, Volker Eberle, Josef Becker, Bernd Maisenbacher, Wilfried Pless, and Michael Goder*

An Optical Receiver for 550 to 950 nm, *Michael Fleischer-Reumann, Emmerich Müller, and Gerd Koffmane*

Optical Standards, *Werner Berkel and Joachim Vobis*

February 1985

HP TechWriter: Illustrated Documents for Engineers, *Elaine C. Regelson and Roy E. Anderson*

HP TechWriter Security

Magnetostatic-Wave Devices for Microwave Signal Processing, *Waguih S. Ishak and Kok-Wai Chang*

Magnetic Resonance and YIG-Sphere Devices

Spin Waves and Magnetostatic Waves

Disc Caching in the System Processing Units of the HP 3000 Family of Computers, *John R. Busch and Alan J. Kondoff*

Glossary

Disc Cache Performance Tools

The MPE-IV Kernel

March 1985

HP Maintenance Management: A New Approach to Software Customer Solutions, *Joseph L. Malin and Irving Bunton, Jr.*

The Need for Plant Maintenance

Development of a High-Performance, Half-Inch Tape Drive, *Hoyle L. Curtis and Richard T. Turley*

LSI Simplifies Tape Drive Electronic Design

System Integration

Write and Read Recovery Systems for a Half-Inch Tape Drive, *Wayne T. Gregory*

Digital Formatting and Control Electronics for Half-Inch Tape Data Storage, *Jimmy L. Shafer*

Streaming Tape Drive Hardware Design, *John W. Dong, David J. Van Maren, and Robert D. Emmerich*

Firmware for a Streaming Tape Drive, *David W. Ruska, Virgil K. Russon, Bradfred W. Culp, Alan J. Richards, and John A. Ruf*

Low-Cost, Highly Reliable Tape Backup for Winchester Disc Drives, *John C. Becker, Donald A. DiTommaso, and Sterling J. Mortensen*

A Design Methodology for Today's Customers

Tape/Disc Controller Serves Integrated Peripherals, *Craig L. Miller and Mark L. Gembarowski*

Cartridge Tape Data Integrity Ensured at Five Levels, *K. Douglas Gennetten*

Controlling the Head/Tape Interface, *Walter L. Auyer, Charles H. McConica, David J. Schmeling, and Mark E. Wanger*

Software Methodology Preserves Consistency and Creativity, *Mark L. Gembarowski*

April 1985

A Low-Cost, Compact, Block-Mode Computer Terminal, *Jean-Louis Chapuis and Michèle Prieur*

A Reliable, Low-Cost Keyboard Interface

Mechanical Design of a Low-Cost Terminal, *Michel Cauzid*

VLSI Design in the HP 2392A Terminal, *Jean-Jacques Simon*

A Fast Gate Array Companion for a CRT Controller

How to Scroll Smoothly

Fully Automated Production of Display Terminal Printed Circuit Assemblies, *Christian-Marcel Dulphy*

A Low-Cost, Reliable Analog Video Display Terminal Design, *René Martinelli and Jean Yves Chatron*

An Intelligent Plotter for High-Throughput, Unattended Operation, *Martin L. Stone, Peter L. Ma, Jeffery W. Groenke, and Todd L. Russell*

Low-Mass, Low-Cost Pen-Lift Mechanism for High-Speed Plotting, *Tammy V. Herr and Hatem E. Mostafa*

The HP 7550A X-Y Servo: State-of-the-Art Performance on a Budget, *by David C. Tribolet, Kenneth A. Regas, and Thomas J. Halpenny*

Firmware Provides Simple and Powerful Plotter Operation, *Thomas J. Halpenny*

May 1985

History of ThinkJet Printhead Development, *Niels Nielsen*

Mass-Producing Thermal Ink-Jet Printheads

Preventing Hydraulic Crosstalk

An Inexpensive, Portable Ink-Jet Printer Family, *Cheryl V. Katen and Thomas R. Braun*

Alignment of Bidirectional Text

Printhead Interconnect

Custom VLSI Microprocessor System

Home Switch Design

Development of the Thin-Film Structure for the ThinkJet Printhead, *Eldurkar V. Bhaskar and J. Stephen Aden*

Where the Ink Hits the Paper. . .

The ThinkJet Orifice Plate: A Part with Many Functions, *Gary L. Siewell, William R. Boucher, and Paul H. McClelland*

Electroforming

Viewpoints—Managing the Development of a New Technology, *Frank L. Cloutier*

Thermodynamics and Hydrodynamics of Thermal Ink Jets, *Ross R. Allen, John D. Meyer, and William R. Knight*

The ThinkJet Orifice Plate: A Part with Many Functions, *Gary L. Siewell, William R. Boucher, and Paul H. McClelland*

Electroforming

Viewpoints—Managing the Development of a New Technology, *Frank L. Cloutier*

Thermodynamics and Hydrodynamics of Thermal Ink Jets, *Ross R. Allen, John D. Meyer, and William R. Knight*

June 1985

A New Family of Dot Matrix Line Printers, *Bryce E. Jeppsen*
Design for Reliability in the HP 256X Family of Line Printers
Dot Matrix Printbar Design and Manufacturing, *John S. Craven*
Shuttle System and Packaging of a Low-Cost, High-Reliability, 300-lpm Line Printer, *by Jeffrey M. Lantz and Ben B. Tyson*
Mechanical Design of a Family of High-Speed Impact Line Printers, *George V. McIlvaine, Stephen L. Testardi, Daniel D. Wheeler, and Peter Gysling*
Computer Modeling of a Paper Drive Mechanism
Resonance Search Technique
Cost-Effective, Versatile Line Printer Electronics and Firmware, *Philip Gordon, Phillip R. Luque, and Donald K. Wadley*
Vector Graphics for Dot Matrix Printers
Printer Command Language Provides Feature Set Standard for HP Printers, *Ernest F. Covelli, Von L. Hansen, and David L. Price*
Native Language Support for Computer Systems, *Jonathan E. Bale and Harry E. Kellogg*
Native Language Collating Sequences for Europe

July 1985

A Protocol Analyzer for EDP Centers and Field Service, *Aileen C. Appleyard, Roger W. Ruhnow, William Grant Grovenburg, and Wayne M. Angevine*
How Protocol Analysis Can Help
Protocol Analyzer Software Development
Simple Architecture Provides High Performance for Protocol Analysis, *Stephen H. Witt and Roger W. Ruhnow*
Protocol Analyzer Power Supply Design
Protocol Analyzer Mechanical Design
Making a Protocol Analyzer Producible and Serviceable
Serial Data Acquisition and Simulation for a High-Speed Protocol Analyzer, *Mark D. Keisling, Dorothy J. Yackle, David B. Karlin, and Elizabeth Gates Moore*
A Low-Cost, Portable Field Service Protocol Analyzer, *Vonn L. Black, Alan Delwiche, Chris L. Odell, and Stephen B. Tursich*
Remote Monitoring and Control of Semiconductor Processing, *Wesley H. Higaki*
SECS

August 1985

Beyond RISC: High-Precision Architecture, *Joel S. Birnbaum and William S. Worley, Jr.*
Architecture Genealogy
Development of a Two-Channel Frequency Synthesizer, *Michael B. Aken and William M. Spaulding*
Discrete Sweep
Two-Channel Synthesizer Phase Calibration
Applications of a Two-Channel Synthesizer, *Michael B. Aken*
Measuring Intermodulation Distortion with a Two-Channel Synthesizer
Synthesizer Firmware for User Interface and Instrument Control, *David A. Bartle and Katherine F. Potter*
A High-Level Active Mixer, *William M. Spaulding*
Automated Test Data Collection for IC Manufacturing, *Rand I. White*
EA-10 Data Analysis System

September 1985

VLSI Delivers Low-Cost, Compact HP 3000 Computer System, *James H. Holl and Frank E. La Fetra, Jr.*
High-Volume Test Strategy
Simplicity in a Microcoded Computer Architecture, *Frederic C. Amerson*
Using a Translator for Creating Readable Microcode
Booting 64-Bit WCS Words from a 32-Bit-Wide ROM Word
Simulation Ensures Working First-Pass VLSI Computer System, *Patria G. Alvarez, Greg L. Gilliom, John R. Obermeyer, Paul L. Rogers, and Malcolm E. Woodward*
Creative Ways to Obtain Computer System Debug Tools, *William M. Parrish, Eric B. Decker, and Edwin G. Wong*
The Role of a Programmable Breakpoint Board
Virtual Microcode Memory
New Cardiograph Family with ECG Analysis Capability, *Robert H. Banta, Jr., Peter H. Dorward, and Steven A. Scampini*
ECG Storage and Transmission
Artifact Indication
Computer-Aided ECG Analysis, *John C. Doue and Anthony G. Vallance*
ECG Criteria Language
Pediatric Criteria

October 1985

A Multitasking Personal Computer System for the Technical Professional, *Tim J. Williams and Nelson A. Mills*
Electronics System for a Transportable Computer, *David L. Kepler and James A. Espeland*
Custom Graphics Processor Unit for the Integral PC, *Dean M. Heath*
High-Quality Electroluminescent Display for a Personal Workstation, *Marvin L. Higgins*
Mechanical Design of the Integral PC: Not Just a Desktop Computer with a Handle, *Thomas A. Pearo*
Reducing Glare with Circular Polarizers
A UNIX Operating System Adapted for a Technical Personal Computer, *Ray M. Fajardo, Andrew L. Rood, James R. Andreas, and Robert C. Cline*
A Friendly UNIX Operating System User Interface, *Jon A. Brewster, Karen S. Helt, and James N. Phillips*
Personal Applications Manager
Data Communications
Printer and Plotter Drivers

November 1985

Thin-Film Memory Disc Development, *James E. Opfer, Bruce F. Spenner, Bangalore R. Natarajan, Richard A. Baugh, Edward S. Murdock, Charles C. Morehouse, and David J. Bromley*
M-H Loop Measurements
A Laser Particle Scanner
Dynamic Testing of Thin-Film Magnetic Recording Discs, *John Hodges, Keith S. Roskelley, and Dennis R. Edson*
In-Line Sputtering Deposition System for Thin-Film Disc Fabrication, *George A. Drennan, Robert J. Lawton, and Michael B. Jacobson*
Thin-Film Disc Reliability—the Conservative Approach, *Clifford K. Day, C. Girvin Harkins, Stephan P. Howe, and Paul Poorman*
Manufacturing Thin-Film Discs, *Glenn E. Moore, Jr., Richard S. Seymour, and Darrel R. Bloomquist*
Thin-Film Discs: Magnetic, Electrical, and Mechanical Design, *Michael C. Allyn, Peter R. Goglia, and Scott R. Smay*

December 1985

A High-Performance Signal Generator for RF Communications Testing, *Robert E. Burns*
User Interface and Internal Controller for an RF Signal Generator, *Albert Einstein Lassiter and Charles R. Kogler*
Display Design
Signal Generator Service Features Maximize Uptime, *Michael T. Wende*
Electrically Erasable PROM Storage for Calibration Data
Internally Modular Signal Generator Mechanical Design, *Michael B. Jewell and Mark W. Johnson*
Wide-Frequency-Range Signal Generator Output Section Design, *Robert R. Collison, James B. Summers, Marvin W. Wagner, and Bryan D. Ratliff*
Signal Generator Frequency Synthesizer Design, *Thomas R. Faulkner, Earl C. Herleikson, Ronald J. Mayer, Brian M. Miller, and Mark A. Niemann*
Computer Analysis of Oscillator Loop Gain, Phase, and Q
Audio Modulation Section for an RF Signal Generator, *Gary L. Tong*

PART 2: Subject Index

Subject	Month
A	
Air bearing, thin-film disc, surface characterization	Nov.
ALC loops	Dec.
Algorithm, Autoconfigure	July
Algorithm, curved-line	Apr.
Algorithm, motor startup	June
Algorithm, trigger search	July
Alignment, bidirectional text	May
Alpha window, The Integral	Oct.
Amplifiers, wideband pulse	Jan.
Analyzers, protocol	July
Angle modulation	Dec.
Architecture, computer, high-precision	Aug.
Architecture, computer, microcoded	Sept.
Area fill, plotter	Apr.
Artifact indication	Sept.
Attached processors	Aug.
Attenuators, optical	Jan.
Audio modulation, RF synthesizer	Dec.
Autoconfigure, protocol analyzer	July
Automated assembly, printed circuit	Apr.
Automated logic drawings	Sept.
Azimuth adjustment, tape head	Mar.
B	
Backup, disc	Mar.
BASIC, HP Technical, The Integral	Oct.
Bit error rate test	July
Bit-oriented protocol	July
Bubble nucleation, thermal ink jet	May
C	
Cache memories	Aug.
Caching, disc	Feb.
Capacitive encoder	June
Calibration, self	Aug.
Calibration, signal generator	Dec.
Capture point, printbar hammer	June
Cardiograph	Sept.
Cartridge, tape, certified	Mar.
Character-oriented protocol	July
Cleanable connectors, optical	Jan.
Clock recovery	Mar.
Clock recovery board, tape drive	Mar.
Cocking distance, printbar hammer	June
Collating sequences, native language	June
Compiler technology	Aug.
Computer, HP 3000 Series 37	Sept.
Computer, The Integral	Oct.
Console, maintenance	Sept.
Controller, tape/disc	Mar.
Coprocessors	Aug.
Corebar, dot matrix line printer	June
Corrosion, thin-film memory disc	Nov.
CPU, VLSI gate array	Sept.
Crosstalk, hydraulic	May
Crowning of flexures	June
CRT controller chip	Apr.
Customizable software	Mar.
D	
Data acquisition, protocol analyzer	July
Data base stuffer, TC-10	Aug.
Data capture buffer	July
Data communications, The Integral	Oct.
Data detect and deskew	Mar.
Data formatting, TC-10	Aug.
Data integrity	Mar.
Data link control	July
Data link interface	July
Data protection	Mar.
Data separation	Mar.
Data streams, SECS	July
Data transport records, TC-10	Aug.
Debug tools, computer	Sept.
Delay-line oscillators, MSW	Feb.
Delay lines, MSW	Feb.
Delayed branch instructions	Aug.
Design methodology	Mar.
Development, thin-film disc	Nov.
Dewrinkling, towel ribbon	June
Disc access time	Feb.
Disc backup, Winchester	Mar.
Disc caching	Feb.
Disc domain	Feb.
Discrete sweep	Aug.
Disc, thin-film magnetic recording	Nov.
Dispersion relations, MSW	Feb.
Display drive, energy recovery	Oct.
Display, flat-panel, bit-mapped	Oct.
Display terminal	Apr.
Documentation, computer design	Sept.
Documents, illustrated, software	Feb.
Dot generation logic	June
Doubler output section	Dec.
Drivers, electroluminescent display	Oct.
Drivers, printer and plotter	Oct.
DTS, SPN Data Transport Standard	Aug.
E	
EA-10, data analysis software	Aug.
ECG analysis, storage, and transmission	Sept.
ECG waveform criteria	Sept.
ECL, ECG criteria language	Sept.
E-flexures	June
Electrical-to-optical transducer	Jan.
Electroforming, orifice plate	May
Electroluminescent display	Oct.
EMI suppression, terminal	Apr.
Energy recovery drive scheme	Oct.
Equilibrium mode distribution	Jan.
Ergonomic design, terminal	Apr.
Error correction, tape drive	Mar.
Errors, measurement, characterization	Nov.
Extinction ratio	Jan.
Extractor	Sept.
F	
Faster Than Light simulator	Sept.
Ferrimagnetic films	Feb.
Fiber optic measurements	Jan.
File extent	Feb.
File mapping	Feb.
File system, HP-UX, The Integral	Oct.
Filters, MSW	Feb.
Firmware, graphics plotter	Apr.
Firmware, streaming tape drive	Mar.
Flexures, printbar and counterweight	June
FM loop	Dec.
FM, synthesizer	Dec.
Force balance theory	June
Fractional-N synthesis	Aug. Dec.
Frequency multipliers, MSW	Feb.
Frequency switching time reduction	Dec.
Friction, thin-film memory disc	Nov.
Front-end processor	July
G	
Gate array, CPU	Sept.
Gate array, CRT control	Apr.
GCR format, tape drive	Mar.
Glare reduction, circular polarizer	Oct.
Glide head, thin-film disc, evaluation	Nov.
Graphics, custom processor unit	Oct.
Graphics, ink-jet printer	May
Graphics window, The Integral	Oct.
H	
Half-shifting model, terminal	Apr.
Hammer design, printbar	June
Hammer drivers	June
Head mounting, tape drive	Mar.
Heterodyne output section	Dec.
Hierarchy charts	Mar.
High-precision architecture	Aug.
Hit rate	Feb.
Home switch	May
HP Draft application	Apr.
HP-UX operating system	Oct.
HP Windows	Oct.
Hydrodynamics, thermal ink jet	May
I	
IC manufacturing software	July Aug.
IC, Read	Mar.
IC-10, SPN module	July
IC, Write	Mar.
IF loop	Dec.
Illustrated document software	Feb.

Immediate reporting Mar.
Impact line printers June
Initialization, 32-to-64-bit words Sept.
Ink development, ink-jet printing May
Ink-jet printing May
In-line processing system, thin-film disc Nov.
Insertion, automatic Apr.
Interconnect, printhead May
Interference suppression, terminal Apr.
Integral, The Oct.
Intermodulation distortion measurement Aug.
Inventory control Mar.

J

Jump tables July

K

Kernel, HP-UX, The Integral Oct.
Kernel, MPE-IV Feb.
Keyboard interface Apr.

L

Labor planning Mar.
Language, ECG criteria Sept.
Laser diode characteristics Jan.
Laser optical source Jan.
Laser safety Jan.
LCD design Dec.
Least recently used, disc caching Feb.
Line printers, dot matrix impact June
Link bit propagation July
Liquid-crystal display Dec.
Low-cost HP 3000 Computer Sept.
LSI, tape drive electronics Mar.

M

Magnetic design, thin-film memory disc Nov.
Magnetic resonance Feb.
Magnetostatic surface waves Feb.
Maintenance management software Mar.
Maintenance panel Sept.
Management, new technology development May
Manufacturing, thin-film memory discs Nov.
Master/slave operation, protocol analyzer July
Mechanical design, impact line printers June
Mechanical design, low-cost terminal Apr.
Mechanical design, protocol analyzer July
Mechanical design, synthesizer Dec.
Mechanical design, thin-film memory disc Nov.
Mechanical design, transportable computer Oct.
Media handling, unattend[illegible] Apr.
Media monitor Mar.
Memory manager, The Integral Oct.
Memory, thin-film disc Nov.
Mesial power level Jan.
MFM code Mar.
Microbreakpoint Sept.
Microcoded architecture Sept.
Microprocessor, custom, mask programmable May
Microprocessor servo loop Apr.
MIPS Feb.
Miss, disc caching Feb.
Mixer, active Aug.
Modeling, paper drive mechanism June
Modes, fiber optic Jan.
Morphology measurements, ECG Sept.
Mouse, The Integral Oct.
MPE operating system Feb.
Multidrop, protocol analyzer July
Multilingual applications software June
Multiphase testing Aug.
Multitasking operating system Oct.

N

Native language support June
NEXUS, software tools, TC-10 Aug.
Noise characterization, thin-film disc Nov.
Noise reduction, synthesizer Dec.

O

Odd component insertion Apr.
Optical bench design Jan.
Optical heads Jan.
Optical power measurements Jan.
Optical receiver Jan.
Optical source, 850-nm Jan.
Optical standards Jan.
Optical-to-electrical transducer Jan.
Optimization, best-fit Mar.
Orifice plate, ink-jet printhead May
OSI model July
OSI model, TC-10 and NEXUS Aug.
Output section, RF synthesizer Dec.

P

Paired stackops Sept.
Paper drive, computer model June
Paper feeder, graphics plotter Apr.
Parts catalog Mar.
Passivation, thin-film May
PC-10 July
Peak detector Dec.
Peak detectors, optical measurements Jan.
Pediatric criteria, ECG Sept.
PE format, tape drive Mar.
Pen-lift mechanism Apr.
Performance, disc caching Feb.
Performance tools, disc cache Feb.
Personal Applications Manager, The Integral Oct.
Phase acquisition time reduction Dec.
Phase calibration Aug.
Phase-controlled loop Mar.
Phase-locked loop, fractional-N Aug. Dec.
Phase-locked loop structures Dec.
Phase noise minimization Dec.
Pick list Mar.
Planetary carrier, thin-film disc deposition Nov.
Plant maintenance Mar.
Plot files Feb.
Plotter, graphics, automatic Apr.
Pod, interface July
Polarizer, circular Oct.
Policies, disc management Feb.
Posting to disc Feb.
Power meter standards, optical Jan.
Power supply, dynamic signal analyzer Dec.
Power supply, protocol analyzer July
Power supply, terminal Apr.
Preventive maintenance Mar.
Printbar, dot matrix impact line printer June
Printer Command Language (PCL) June
Printer, ink-jet portable May
Printers, dot matrix impact line June
Printhead, thermal ink jet May
Process control July
Processing, thin-film memory discs Nov.
Program management Mar.
Protocol analyzers July
Pulse generation Aug.
Purchase order tracking Mar.

Q

R

Read after write Mar.
Read ahead Mar.
Read hit rate Feb.
Read miss Feb.
Read recovery system, half-inch tape drive Mar.
Real-time extensions, HP-UX operating system Oct.
Reciprocating printbar systems June
Recovery, roll-forward/rollback Feb.
Reduced instruction set computers Aug.
Reference loop Dec.
Register architecture Sept.
Register reuse Aug.
Release point, printbar hammer June
Reliability, thin-film memory disc Nov.
Remote monitoring July
Remote operation, protocol analyzer July
Resonance search techniques June
Resonant printbar dynamics June
Resonators, MSW Feb.
RF signal generator Dec.
RISC Aug.
Rise-time standard, optical Jan.
Robot, terminal production Apr.

S

SAWR loop Dec.
Scaling Aug.
Schematic entry and generation Sept.
Secondary storage caching Feb.
SECS July
Security, software Feb.
Semiconductor Productivity Network July Aug.

Series 37 Computer Sept.
Servo, half-inch tape drive Mar.
Servo systems, printbar June
Servo, X-Y, graphics plotter Apr.
Shadow paging Feb.
Shift register, dot sequencing June
Shuttle system, line printer June
Signal generator, RF Dec.
Signal generator, two-channel Aug.
Signal processing, ECG Sept.
Signal-to-noise enhancers Feb.
Simulation, gate array chips Sept.
Simulation, protocol analyzer July
Smooth scrolling Apr.
Soft fonts Oct.
SoftPanel Sept.
Software, data collection Aug.
Software debugging panel Sept.
Software, maintenance management Mar.
Software methodology Mar.
Software, multilingual June
Software, process control July
Software security Feb.
Software, translation Mar.
Special function units Aug.
Spectrum program Aug.
Spike elimination Dec.
Spin waves Feb.
SPN, PC-10 Module July
SPN, TC-10 Module Aug.
Spurious response minimization Dec.
Sputtering, in-line system Nov.
Stack architecture Sept.
Start/stop tape drive Mar.
State variable oscillator Dec.
Streaming tape drive Mar.
Sum loop Dec.
Swivel mechanism, CRT Apr.
Synthesizer, RF Dec.
Synthesizer, two-channel Aug.
System integration Mar.

T

Tape drive, half-inch Mar.
Tape drive, ¼-inch Mar.
TC-10, test data collection software Aug.
Terminal, low-cost Apr.
Testers, modular design Nov.
Testing, data collection Aug.
Testing, dynamic, thin-film memory discs Nov.
Text and graphics, side by side Feb.
Text editing software with graphics Feb.
Thermodynamics, thermal ink jet May
Thin-film disc technology Nov.
Thin-film structure, ink-jet printhead May
Thin films, YIG Feb.
ThinkJet Printer May
ThinkJet, The Integral, internal printer Oct.
Tilt mechanism, CRT Apr.
Time base loop Dec.
Towel ribbon control June
Tractor positioning, power June
Transaction management Feb.
Translators, PC-10 July
Transportable computer Oct.
Trap machine July
Triggers, simultaneous, protocol analyzer July
TRS, SPN Test Result Standard Aug.
Two-channel operation Aug.
Two-channel synthesizer Aug.
Two-phase operation Aug.
Two-tone operation Aug.

U

UHF output section Dec.
UNIX operating system Oct.

V

Vector buffer Apr.
Vector graphics, dot matrix printer June
Video display terminal Apr.
Virtual microcode memory Sept.
VLSI CRT controller Apr.
VLSI, custom microprocessor May
VLSI, HP 3000 Series 37 Computer Sept.

W

Wait probability Feb.
Waveform boundary indicator, ECG Sept.
Wear, thin-film memory disc Nov.
Winchester disc backup Mar.
Work order control Mar.
Workstation, personal Oct.
Write-ahead logging Feb.
Write system, half-inch tape drive Mar.
Write wait probability Feb.

X

Y

YIG, thin films Feb.

Z

PART 3: Model Number Index

DC600 High-Density Data Cartridge Mar.
EA-10 Data Analysis System Aug.
IC-10 Integrated Circuit Manufacturing Information System July
PC-10 Process Control System July
TC-10 Tester Collection System Aug.
2225A/B/C/D ThinkJet Printer May
2392A Display Terminal Apr.
2563A 300-lpm Line Printer June
2565A 600-lpm Line Printer June
2566A 900-lpm Line Printer June
HP 3000 Computer Feb.
Mar.
HP 3000 Series 37 Computer Sept.
3326A Two-Channel Synthesizer Aug.
4760A/AI/AM Cardiograph Sept.
4951A Protocol Analyzer July
4953A Protocol Analyzer July
4955A Protocol Analyzer July
5600C ECG Management System Sept.
7550A 8-Pen Graphics Plotter Apr.
7978A Magnetic Tape Subsystem Mar.
8150A Optical Signal Source Jan.
8151A Optical Pulse Power Meter Jan.
8642A/B RF Signal Generator Dec.
9144A ¼-Inch Cartridge Tape Drive Mar.
9807A The Integral Computer Oct.
26061A Vector Graphics Option June
32276A HP Maintenance Management Mar.
46060A HP Mouse Oct.
47611A Adult Criteria Module Sept.
47612A Pediatric Criteria Module Sept.
47619A ECG Collection Module Sept.
81511A Optical Head Jan.
81512A/B Optical Head Jan.
81519A Optical Receiver Jan.
82815J Datacom Package Oct.
82860J HP-UX Technical BASIC Oct.
